

Sales open, and the east shuts

● NETWORK: AMBER

It's the week leading up to Dussehra in India: Amazon's sale opens tonight¹, and tomorrow, Flipkart starts their early access². Most of India looks pretty much like it does around Dussehra - slightly stretched, but fine³, except the east. Odisha shuts for a bandh tomorrow⁴. Kolkata keeps goods vehicles out on Saturday and curbs them all the way to 27th October (Tuesday)⁵. And the sea routes out of India into the Gulf are still shut. On Monday, 11 Indian sailors were reported hurt⁶.

● GREEN the season as usual, which in sale weeks can still be busy • ● AMBER something beyond the season is slowing freight • ● RED something is stopping freight across a state or a major route

HOW'S EACH REGION HOLDING UP?

North ● GREEN

Delhi's roads ran 17 points above usual yesterday⁷, likely due to the INDIA bloc's march through central Delhi⁸. Is this more than the strain we expect for the season? Too early to say, so it stays Green.

West ● GREEN

Apart from seasonal effects, things look steady. The port looks fine too - JNPA's trucks were in and out in about an hour and a half on Tuesday morning⁹.

South ● GREEN

The usual sale-week strain is expected in Bengaluru, Hyderabad and Chennai. IMD now sees a low forming over the Andaman Sea around 13th October, with a low chance of a depression in the central Bay around 15th¹⁰.

East ● RED

Tomorrow's Odisha bandh comes with blockades in the mining belts to stop mineral transport⁴. This is followed by Saturday's truck ban in Kolkata. Congress has also promised a seven-day mining blockade after Dussehra, but the dates are not confirmed¹¹. The bit that actually worries me is the trend: after each sale opening in the last four years, West Bengal's logistics helpline searches have gone up 2.2, 2.5, 3.8 and then 6 times¹².

Northeast ● AMBER

NH-10 into Sikkim is shut at night from tonight. The Silchar road on the Barak Valley side is expected to have heavy rains today.

Central ● GREEN

Nothing to report beyond the usual seasonal strain. Pretty boring, but in a good way.

DATES TO WATCH

DECISIONS TO MAKE

- 1 Sale volume lands on every metro hub at once, starting tonight^{1,2}. Whatever backlog you carry into tomorrow stays for the whole peak, and there is no respite after it to clear the hubs. **How much extra sort and linehaul do you run this week?**
- 2 The east stops twice in the first three days of the sale - Odisha's bandh, then Kolkata's Mahalaya truck ban - and from 13th October, trucks serving Kolkata port get four hours a day, and none during the immersions⁵. With curbs that long, going early is the least risky bet here. **Which eastern loads move before the bandh on 8th October (Thursday), and which Diwali-critical imports have to clear Kolkata port before the curbs start on 13th October (Tuesday)?**
- 3 The Gulf route is shut, and westbound air and ocean space is tight going into peak¹³. Waiting for prices to drop sounds nice. May be they will, but I wouldn't bet the Diwali orders on it. **How much Europe and US space do exporters commit for peak-season orders while some is still available?**

NETWORK INSIGHTS

Cost of a delay is my call: High where a delay holds up export orders or warehouse inputs; Medium for stock replenishment.

1 The first 72 hours

HIGH CONFIDENCE

Helpline searches in sale weeks, times a normal week

	2022	2023	2024	2025
Kolkata	2.2x	2.5x	3.8x	6x
Chennai	1.5x	1.4x	1.6x	2.2x
Delhi	1.7x	1.2x	1.4x	1.9x
Bengaluru	1.4x	1.8x	1.5x	1.8x
Hyderabad	1.4x	1.8x	2.8x	1.4x
Mumbai	1.4x	1.4x	1.4x	1.4x

In the four weeks after each of the last four sale openings, courier-helpline searches went up 1.2 to 1.9 times in Delhi, Maharashtra and Karnataka, and up to 2.8 times in Telangana³. This year, Flipkart claims to have added more than 900 festive delivery hubs¹⁴ and 2.5 lakh seasonal job openings¹⁵. Whether they get filled in time to clear backlogs before the sale surge kicks in is yet to be seen.

Backlog is like credit-card debt: whatever you carry into Thursday collects interest every day of the peak. Except, nobody gives you a loan in sale week - no spare riders, no spare trucks, everyone buying the same capacity. So outside the east, the first 72 hours decide the sale.

3 Everyone's going west

Europe and the US, by sea and by air

● AMBER · HIGH COST OF DELAY · HIGH CONFIDENCE

Maersk's peak-season surcharge on contract boxes from northwest India to the US East Coast is \$7,150 from 2nd October¹⁸. International air freight through Indian airports was up 15.5% YoY in August¹⁹, and India-US air tonnage is 15% up, with rates 7% higher in a single week²⁰. Everyone seems to be going west.

So the space gets dearer just as the Christmas orders need it. The exposure sits with exporters whose peak orders still have nothing booked.

2 The Gulf is still shut

Central India → Mundra → Gulf

● RED · HIGH COST OF DELAY · HIGH CONFIDENCE

Ships crossing the Strait of Hormuz in a day¹⁶

Before the war	about 85
4th October	about 4

About 4 ships crossed Hormuz on 4th October. Before the war, the number was about 85 a day¹⁶. On Monday a projectile hit a tanker there and injured 12 of its crew⁶. India-Middle East rates are up 25–40% since late August¹⁷.

The exposure sits in every Gulf contract priced before late August.

4 Who blinks first on diesel?

MEDIUM CONFIDENCE

Diesel, ₹ a litre²¹

Nayara, from 3rd October	+₹3
State retailers	₹0
State retailers' loss, Sept	about ₹9

Nayara did, raising diesel by ₹3 a litre at 7,108 outlets from 3rd October, its second rise this year²². The state retailers, who run over 90% of India's pumps, haven't moved, though ICRA estimated they lost about ₹9 a litre on diesel in September²¹. And the Centre's diesel excise has been nil since March, so there's no duty left to cut²³. In May, more than 68 transport unions in Delhi-NCR had been on a strike for three days, with fuel costs among their demands²⁴.

So will the state retailers raise prices during the festive weeks? Can they afford not to? I don't know, and I won't pretend to. What I do know is that the exposure sits in every contract with automatic diesel pass-through.

5 Rail is the only one adding seats

MEDIUM CONFIDENCE

The Western freight corridor has run from Dadri to JNPA since 8th September, with double-stack trains to the port²⁶. Rail loading was up 5.4% in August, domestic containers 9.2%²⁷, yet only 13.5% of JNPA's boxes went by rail in July²⁵. At GRAP Stage III Delhi restricts BS-IV and older light and medium goods vehicles from outside, and the essential-goods exemption ends this month²⁸.

Freight moved onto the corridor now is capacity booked before late October. After that, Delhi's rules take the older trucks out of the pool, just when every shipper wants road space.

MEASURED THIS MORNING

City roads against usual, daily, 30 Sep–6 Oct⁷ **amber = 10+ over**

JNPA truck turnaround, hours⁹

Paradip cargo, thousand tonnes a day²⁹

THE LANES I'M WATCHING

- NH-10 Siliguri–Gangtok** Sikkim's one and only trunk road Shut to all vehicles 9 pm to 6 am on the Sevoke–Rangpo stretch, tonight to 15th October and 26th October–5th November³⁰.
- NH-6 to Shillong and Silchar** Barak Valley, Mizoram, Tripura Heavy rain in places over Nagaland, Manipur, Mizoram and Tripura today³¹, so I'm holding it Amber till 9th October (Friday).
- NH-44 Jammu–Srinagar** Kashmir's all-weather link Single-lane stretches at Chenani–Udhampur and Magarkot–Khooni Nallah, tankers allowed only at night, which isn't advisable³².
- NH-16 through Odisha** East coast trunk, Kolkata–Chennai Red tomorrow for the bandh, then Amber while the trucks clear.
- Kerala ghats into Idukki** Kochi–Munnar–Kumily roads Rain across the state till 11th October, heavy in places on 9th and 10th³¹.

CALLS I'LL CHECK NEXT WEEK

- Delhi diesel at the state retailers' pumps is still ₹95.20 on 14th October (Wednesday)³³.
- IMD's Andaman Sea low forms by 14th October, but no depression forms in the Bay before 16th October¹⁰.
- Kolkata's roads run more than 10 points above usual on at least four of the seven Puja curb days, 13th–19th October⁷.

How I rate this, and what I can't see. I rate against the season, because a sale week is never going to look like a quiet week in April, right? A Red road drags down the hubs at both ends, and a hub stays Amber about two days after its cause clears, longer after a Red. Air shows up only with measured numbers (AAI, WorldACD). Confidence is High when the facts are dated and primary or measured, Medium when they rest on a proxy or a forecast. Normal sale weeks come from Google searches for the Delhivery, Ekart, Blue Dart and DTDC helplines, each city read from its state: the busiest week in the four after Amazon's sale opens, against a normal week in the eight before. Mind you, they count customers chasing parcels, not late parcels. Based on my experience in e-commerce & logistics, it's partly driven by anticipatory anxiety rather than actual delayed status. If I am wrong, we'll find out in the subsequent weeks. Built from public sources only. The ratings are my judgement on the likelihood of on-time delivery, not measured service levels. Every number links to its source; all 33 are at thefavrito.github.io/editions/2026-10-07/. Map boundaries: [DataMeet](#), CC BY 4.0.
